

3d Model and Printing My Jupiter Lamp shades - MASSIVE work - part 2 of 2

Changes were made to the model in the previous version, and in the interim update, we saw there was a potential problem with filament.

We pull the print off the bed and apply some art resin mixed with pearlescent pigments, and then apply them to reduced the weak spots. Then put the lampshade on the lamp, and test out the LED appearance. Its pretty exciting!

****ADDITIONAL THOUGHTS****

I used the wrong fill, and got some interesting hexagons in the print. Definitely will complete a third version of the lamp shades.
