

Custom 3d Model & Print RGB LED Light Base for Mermaid Resin Art Piece

In a previous video, I created a resin art piece for @tallgirlsydney because she loves mermaids. In the process, the mold I used kind of took on a unique shape, and rather than hang this on the wall, I designed a base for it to sit in. There are provisions in the model and print in case I want to hang it on the wall later.

I used an RGB LED light strip from 5Below and cut it to fit. The result is pretty neat - A Custom 3d Modeled & Printed RGB LED Light Base for our Mermaid Resin Art Piece
